It also gives companies the ability to conveniently **deliver and track training**, no matter the size of the organisation.

S.A. Associates Training certified eLearning courses

Asbestos awareness	Controlling hazardous substances (COSHH)	Data Protection
Introduces those who may work with asbestos containing materials, and the practical steps they should take to ensure any planned maintenance is in conjunction with the Control of Asbestos Regulations 2012.	Explores the hazards, risks and safety measures associated with various liquids, powders and gases that are used in a range of working environments.	Discover the importance of collecting, using and saving personal and sensitive data appropriately to protect individuals' rights and uphold an organisation's reputation.
Display Screen Equipment	Driving at work	Environmental Awareness
Explains the risk and control measures that can be implemented in the working environment to ensure DSE is used safely.	Identifies what is meant by driving at work, the laws that apply to driving at work, the hazards associated with driving at work and also the most appropriate control measures to help preserve life.	An online course covering environmental issues associated with business activities to protect the business as well as the environment.
Equality in the workplace	Fire safety	First aid essentials
Essential guidance for employees on equality and diversity to meet the requirements of the UK Equality Act 2010.	Introduces people to the related dangers, controls and personal responsibilities to help contribute to a safer working environment and covers the requirements of the UK RRFSO 2005 and principles of fire safety.	Introduces the basic skills needed as a first responder, including CPR, the recovery position and using an AED. It features video demonstrations from trained first aid professionals.
Introduction to Health and Safety	Lone working	Managing accidents and incidents
Online training in the essential issues related to health and safety at work and the key areas when considering potential hazards.	Introduces organisations and individuals to the considerations of lone working, as governed by the Health and Safety at Work etc. Act 1974, and the Management of Health and Safety at Work Regulations 1999.	Introduces the formal categorisation of workplace incidents, potential costs for organisations and the people involved, and the duties to report and investigate these in conjunction with RIDDOR 2013.
Manual handling	Risk assessment	Slips, trips and falls
Introduces people to the hazards associated with everyday manual handling tasks and the best practice techniques and control measures that should be considered to aid safe working and avoid injury.	Introduces the concept, value, and the practical steps of the risk assessment process, and the legal principles of completing such an assessment, as governed by the Management of Health and Safety at Work Regulations 1999.	Introduces the consequences of accidents caused by slips, trips and falls, the common causes of slips, trips and falls in the workplace and also how they can be reduced.
Stress and workplace wellbeing	Work at height	
Explores the issue of wellbeing and what factors can contribute to or cause stress, and affect mental health, and how these factors can be managed more effectively within the workplace.	Introduces the hazards associated with everyday work at height tasks and the best practice control measures that should be considered to aid safe working and avoid injury.
