

New Courses from IOSH

1 Day Environment for Business

The benefits to business of being more environmentally sustainable are huge.

The IOSH one-day course *Environment for Business* offers an essential introduction to all organisations looking to implement or transition to ISO 14001:2015.

Developed with the support of leading environmental experts, the course supports decision-makers to understand compliance responsibilities, how to save money and make money and crucially how to unlock innovation through good environmental management across the value chain.

The course covers:

- what is the environment?
- how does the environment have an impact on organisations?
- what are your compliance responsibilities?
- changes to ISO 14001
- how to implement measures to make money, save money and unlock innovation in your value chain

1 Day Fire Safety for Managers

Developed in collaboration with world-renowned experts, IOSH has created the new *Fire Safety for Managers* course. The one-day course is designed to help managers and business owners take the lead in establishing an effective fire safety culture in their business. It uses applied learning, allowing small groups to work through relevant case studies to gain a full understanding of fire risks and how best to manage them.

½ Day Fire Safety Awareness

Developed in collaboration with world-renowned experts, IOSH has designed the new *Fire Safety Awareness* course.

Being aware of fire safety at work is everyone? This half-day course will ensure that this is understood? And that people know how to assess risks and what to do in the event of a fire.

The course uses an applied learning approach in which small groups work through relevant case studies and learn by example.
